Professional Summary

Software Engineering undergraduate with hands-on experience in full-stack web development, REST APIs, backend systems, cloud deployment, and scalable application development. Strong foundation in Data Structures & Algorithms, OOP, DBMS, Operating Systems, and Software Development Life Cycle. Experienced in building production-oriented applications using Python, JavaScript, Flask/FastAPI, SQL, AWS, and modern web technologies with focus on clean architecture, debugging, testing, and collaborative development. Open to long-term product engineering roles and fast-paced collaborative development environments.

Education

B.Tech – Artificial Intelligence & Machine Learning (Software Engineering Focus), **PSIT Kanpur** – 2023–2027
70.21%
Class XII (CBSE), **R.P.M Academy** – 78.34% 2021–2023
Class X (CBSE), **R.P.M Academy** – 88% 2020–2021

Projects

Neurix — Full Stack Web Platform Mar 2026

- Developed 10+ scalable REST API endpoints using Flask for authentication, session management, routing, and backend workflows
- Built reusable and responsive frontend components using HTML, CSS, JavaScript, and modular UI practices
- Implemented exception handling, API validation, debugging workflows, and optimized request processing
- Designed and executed 30+ manual and automated test cases to improve reliability and reduce regressions
- Deployed cloud-hosted services on AWS EC2 using Gunicorn in Linux production environment
- Maintained Git-based version control workflows with structured commits and collaborative development practices

Synapto — Productivity & Analytics Platform Ongoing

- Developing a scalable full-stack productivity platform with task management and analytics features
- Building REST APIs using FastAPI/Flask for authentication, task handling, analytics, and backend workflows
- Designing responsive frontend interfaces using ReactJS and Tailwind CSS for real-time data interaction
- Implementing JWT-based authentication, PostgreSQL database management, and secure cloud-based workflows
- Developing analytics dashboards with productivity tracking and performance visualization
- Working with AWS services including EC2, S3, Route 53, Lambda, and RDS for deployment and infrastructure
- Integrating AI-powered recommendation modules for smart insights and automation features

Skills

Languages	Python, JavaScript, SQL
Frontend	HTML, CSS, ReactJS, Tailwind CSS, Responsive Design
Backend	Flask, FastAPI, REST APIs, JWT Authentication, API Integration
Databases	PostgreSQL, MySQL, DBMS Concepts, Query Optimization
Cloud & Tools	AWS (EC2, S3, Lambda, RDS, Route 53), Git, GitHub, Linux, Postman
Core CS	Data Structures & Algorithms, OOP, Operating Systems, DBMS, SDLC
Testing	Manual Testing, Test Case Design, Debugging, Performance Testing

Problem Solving

- Practicing Data Structures & Algorithms with focus on arrays, linked lists, trees, graphs, recursion, dynamic programming, and problem-solving patterns
- Solved coding problems on LeetCode and other competitive programming platforms
- Strong understanding of time complexity, space optimization, and algorithmic thinking

Coding Profiles

- LeetCode – Regularly practicing Data Structures, Algorithms, and coding interview problems

Positions of Responsibility

Content Head – Vyoumouts Club	Led technical content initiatives, managed creative teams, and organized knowledge-sharing sessions for 50+ members
Web Dev Member – GDGOC PSIT	Developed reusable frontend components and collaborated on development-focused technical projects
Singing Head – Navrang Club	Led and coordinated teams for large-scale cultural performances and event management activities

Certifications

Generative AI Course – Google Cloud & Simplilearn	Sep 2025
Build an App with RAG (Retrieval-Augmented Generation) Program	2025
